

# Remote Collaboration Solution from Numotion

**Together, as we navigate the uncharted waters brought by the global coronavirus pandemic it is critical that we continue to find new ways to safely and effectively serve our shared clients.**

In support of social distancing practices, and to accommodate restricted physical contact situations, we are enabling remote technology through the Microsoft™ Teams video conferencing platform to enable all of our ATPs to engage with you, and our shared clients remotely.

If you or your facility determines that remote collaboration is appropriate\*, Numotion ATPs now have access to the necessary tools to enable that interaction.

## **When will Numotion make remote technology available?**

Use of remote technology will be available in situations when it is impossible or unreasonable for both the ATP and the LCMP to be physically present.

- Evaluations
- Deliveries/Final fitting
- Partnership Reviews

## **Guidelines for Remote Evaluations with Numotion:**

- One party (ATP or clinician) must be present, in person, with the client/patient.
- In person ATP follow-up visits will be performed prior to authorization for complex rehab clients when the ATP is the remote party.
- Documentation must be completed independently.
- Therapists attending an evaluation remotely should refer to Information from the relevant payer to understand billing for these services.

## **What is Microsoft Teams?**

Microsoft Teams is a secure and HIPAA compliant application that supports team collaboration through chat, voice, and video conferencing. This technology can be accessed through mobile IOS and Android devices as well as through desktop/laptop computers with the Chrome web browser.

## **How does it work?**

Your ATP will send you a meeting invite through email with a link to download the Microsoft Teams application. You will need to follow the simple download instructions and set up a free account using your work email address. After log in, both our ATP and you will have access to open video conferencing functionality and will be able to interact as necessary. Prior to your first remote evaluation we encourage you to work with your ATP to perform a dry run for initial setup. We are excited and committed to partnering with you as we pioneer solutions to meet the needs of our customers in this tumultuous time. Please reference the step by step guide we have provided for the setup of Microsoft™ Teams.

If you or your IT department have technical questions for enabling Microsoft teams please contact Collaborate@numotion.com. For more information on Numotion policy regarding remote collaborations you may contact John Pryles, Executive Vice President of Sales at, John.Pryles@numotion.com.

*\*Numotion is providing access to remote technology to facilitate socially distanced evaluations. Therapists should refer to their own facilities, organizations, representative bodies and relevant payers to understand appropriateness of these methods, and how/if they should be billed. Therapists remain responsible for their own billing and payment. Numotion assumes no liability to a therapist or organization that attends an evaluation remotely using Numotion's video conferencing facilities.*
