

Freedom Trax: Safely Maneuver New Terrain and Rough Weather Conditions

Explore Confidently & Safely

Freedom Trax is a motorized track system designed to allow manual wheelchair users to safely and independently traverse sand, snow, gravel and mud.

Freedom Through Convenience

Freedom Trax products are lightweight, portable and easy to mount/dismount. All 3 offered models include:

- Rechargeable lithium ion battery, and charger
- Cutting edge joystick that turns on a dime
- Five mile operating range

FT1

The FT1 can be mounted and dismounted without assistance and comes with two 24V motors. It is adjustable for wheel widths between 17 - 26 inches, allowing you to use if you switch or update wheelchairs.

FT2

The FT2 includes a chair for the user to sit in. This chair is easily detachable, allowing the user to fold the chair and place within a vehicle.

FT Pro Pack

The FT Pro Pack takes the Model FT1 to the next level. It can be mounted and dismounted without assistance and comes with two 24V motors. It is adjustable for wheel widths between 17 - 26 inches, allowing you to use if you switch or update wheelchairs.
