Key features

Tough touchscreen display

Grid Pad 15 has a 15.6" HD touchscreen, with a hardened glass display. The anti-glare finish helps to reduce reflections and makes it easier to see the screen when you are out and about.

Powerful device

Grid Pad 15 has a fast processor, perfect for communicating quickly and running programs using Computer Control.

All day battery

Grid Pad 15 is designed to help you communicate all day long. The large battery provides up to 14 hours continuous use (9 hours with eye gaze).

Antimicrobial casing and screen

Antimicrobial Sanitized® technology within the case and screen inhibits the growth of bacteria and viruses.

Switch and USB devices

There are two built-in ports for switches, and two USB ports to use with any other type of alternative access, such as a joystick, trackball or HeadMouse Nano.

Eye gaze ready

Turn your Grid Pad into an integrated eye gaze device with our purpose-built camera unit. Available with Lumin-i or Alea eye gaze technology.

We also have bespoke mounting plates for use with other eye trackers.

Full colour second screen

The 4.6" second screen shows your message on the rear of the device, improving communication in a range of situations. Animated dots let others know not to interrupt while you compose your message.

Share your messages privately rather than projecting audio to everyone around and control when others can see it with one click.

Antimicrobial casing

Grid Pad 15 is built with an antimicrobial casing and screen to inhibit the growth of bacteria and the spread of viruses, helping to keep your device cleaner for longer.

- ✓ Inhibits bacteria and virus growth
- ✓ Prevents unpleasant odours
- ✓ Cannot be removed by cleaning
- ✓ Sanitized® technology

The technology has not yet been tested on COVID-19, however it has been successfully tested against similar viruses including Influenza, Avian flu and SARS.

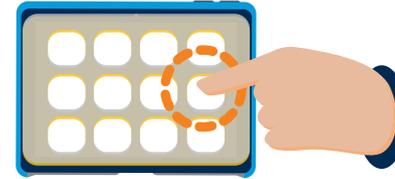

Accessories

Remote power button

Grid Pad comes with our remote power button, to give you more independence. You can plug any switch into the button and use it to turn the Grid Pad 15 on.

Need a keyguard?

Our latest keyguards use non-slip suction technology to fix in place. Super easy to assemble and clean, no tools required. Available as an optional extra.

Also provided with your Grid Pad:

Manual, dual mounting plate, screwdriver, power lead, Grid 3 getting started guide, cleaning cloth, optional port labels

Other key features

 Powered by Grid

Everything you need for communicating, controlling your environment, message banking, browsing the internet, using social media and much more!

 Amplified sound

The integrated speakers are engineered to produce high quality sound and volume, to help get your message across effectively wherever you are.

 Mounting options

Easily mount your device to a floor stand with the Grid Pad dual mounting plate, compatible with Daessy and Rehadapt mounting systems.

 Environment Control

Control everything from your lights to your TV. The infrared learning window is located on the front for quick and easy programming.
